PROFILE

Since 2013, I have developed web applications using Microsoft architectures in different business environments. I have worked at corporate level in environments that require teamwork. I tried to write applications as error-free as possible, to meet the needs in the long term and in a flexible way.

I used Visual Studio and Visual Studio Code as application development environment and TFS for version control tool and task/process tracking. Although I mostly like to develop on the backend side, generally worked as Full-Stack Developer. I was a team member in all jobs and made all phases of development (analysis, design, development, test).

Besides, I worked as a CCNA and CCNA Security instructor on active Cisco products for 3 years. With Cyber Security, I worked individually on Linux, IOT, IOT Security, Big Data, AI, and Python.

SKILLS

○ **BACKEND**
- ASP.NET
- MVC
- WEB FORMS
- C#
- SQL
- MICROSERVICES
- LINQ
- SSRS
- TFS
- VISUAL STUDIO
- LLBLGEN (ORM)
- PYTHON
- GIT

EXPERIENCE

Backend Developer

Overtech – Istanbul (Remote)

01/2022 – Present

Work as a member of a team that develops microservices project for a logistics company. Project architecture is Entity Framework with MSSQL and MongoDB.

Web Application Developer

Agartha Technology – Ankara (Hybrid)

02/2020 – 07/2021

Work as a member of a team that develops Entity Resources Planning (ERP) Project for a government agency. We use LLBLGen for ORM tool and use Telerik Kendo-UI for frontend development. Project architecture is MVC. Besides Telerik Reporting Service and MSSQL/PostgreSQL are used for this project.

- ◦ **FRONTEND**
  - HTML 5
  - CSS
  - JAVASCRIPT

- ◦ **NETWORK / SECURITY**
  - CCNA INSTRUCTOR
  - CCNA CYBEROPS

Instructor

Government – Ankara

11/2016 – 01/2020

Teaching graduate students network security. We use Cisco Network Academy environment (CCNA / CCNA Security).

Web Application Developer

Government – Ankara

06/2013 – 10/2016

Work as a web developer in a team of Human Resources Management Systems. Daily job is development, test and maintain. We migrated project from .NET Framework to Entity Framework. I migrated a desktop project (written in Delphi) to the web project. We mostly use Visual Basic, C#, LINQ, HTML, CSS, JavaScript, MSSQL, SSRS, TFS.
